DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group II, claims 38-54 in the reply filed on 6/23/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). (Note: the examiner notes the error in the listing of claims pointing out by the applicant and thanks the applicant for the in which is was addressed. The right to file a divisional is dully noted.)

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 38-54 are rejected under 35 U.S.C. 102(e) as being anticipated by Miner et al (6438793).

Miner et al discloses a floor cleaner as disclosed in claims 38-54. Miner et al discloses all of the parts as especially since this is the old technology of the

assignee. The actuator in the handle is (430) with a cable, the first and second positions can be anything such as moving and not moving, and the third position can be the placement of the agitator, (It is noted that these position limitations do not really claim any mechanism for accomplishing the positions the limitations do not even claim that the roller is moving on off the carpet.)

Claims 38-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Kasper et al (6286181 and 6203362).

Kasper et al discloses a floor cleaner as disclosed in claims 38-54. Miner et al discloses all of the parts as especially since this is the old technology of the assignee. The actuator in the handle is (430) with a cable, the first and second positions can be anything such as moving and not moving, and the third position can be the placement of the agitator, (It is noted that these position limitations do not really claim any mechanism for accomplishing the positions the limitations do not even claim that the roller is moving on off the carpet.)

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art being made of record.
